Professional Summary

Senior Full Stack Engineer with 5+ years of experience designing scalable systems, reviewing complex codebases, and solving challenging engineering problems across modern web technologies. Experienced in AI-assisted development, technical evaluation, and delivering high-quality software in fast-paced environments.

Skills

- **AI & LLMs:** Prompt Engineering, LLM Evaluation, AI-Assisted Development, Human Feedback Evaluation, AI Output Review, Agentic AI Workflows, Function-Calling Evaluation, Azure, PyTorch.
- **Backend & APIs:** Node.js, Express.js, Ruby on Rails, Python, TensorFlow, Django, Flask, REST APIs, GraphQL, WebSockets, SSE, System Design, Software Architecture
- **Full-Stack:** React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, MUI, Chakra, Redux, React Query, Jotai, Vite
- **Data & Messaging:** PostgreSQL, MySQL, SQL Server, SQLite, MongoDB, Redis
- **DevOps & Cloud:** AWS EC2/S3/Lambda/RDS, Azure, Docker, Vercel, Cloudflare, CI/CD, Firebase, OAuth/Socialite.

Professional Experience

Agentic AI Engineer (Contract) | Turing

Palo Alto, CA (Remote) | Jan 2026 - Present

- Developed and optimized Python-based AI applications and internal platforms that leveraged large language models (LLMs) to assist users with complex queries and task execution.
- Applied Supervised Fine-Tuning (SFT) and Reinforcement Learning from Human Feedback (RLHF) techniques to improve LLM performance and response quality.
- Designed prompts, evaluated model outputs, and iteratively refined instructions to improve reasoning accuracy and task completion.
- Contributed to the development of internal tools, including a JSON schema generator and a labeling tool.

Team Lead (Contract) | GrowthRunes

UAE (Remote) | Sep 2025 – March 2026

- Conducted code reviews, mentored engineers, and established best practices that improved code quality and maintainability across the team.
- Collaborated across product, design, and engineering teams to translate ambiguous requirements into scalable technical solutions.

Senior Software Engineer (Contract) | GrowthRunes

UAE (Remote) | June 2025 – Aug 2026

- Architected and delivered a real-time, socket-based chat platform supporting user-to-user and user-to-agent communication
- Expanded messaging capabilities through SMS, Email, and WhatsApp integrations.
- Implemented Server-Sent Events (SSE), reducing polling overhead and improving real-time update efficiency by approximately 40%.
- Built a real-time 3D avatar rendering system using Three.js and react-three/fiber to render Ready Player Me avatars dynamically.

Software Engineer | Kollegio

Stanford, CA, US (Remote) | Feb 2024 – June 2025

- Improved application load time by **35%** by optimizing API interactions, reducing redundant requests, and implementing efficient client-side state management.

- Leveraged AI-assisted development tools to accelerate implementation, validate solutions, and improve engineering productivity.
- Designed and implemented robust server-side data handling strategies that enhanced application stability and reduced runtime failures.
- Delivered end-to-end product features from requirements gathering through deployment, contributing to improved user engagement and retention.
- Diagnosed and resolved cross-browser and cross-device compatibility issues, significantly reducing production defects and support overhead.
- Integrated monitoring, logging, and analytics solutions to identify bottlenecks, investigate issues, and drive data-informed product improvements.
- Maintained and optimized CI/CD pipelines, strengthening release reliability through automated testing and validation.

Software Engineer | Devsinc

Lahore, Pakistan | Jan 2022 – January 2024

- Developed and maintained full-stack applications using React, Python, and Ruby, delivering features across multiple client projects.
- Designed and optimized relational and NoSQL database schemas to improve query performance and support scalable application growth.
- Built and integrated RESTful and GraphQL APIs, including third-party services, enabling seamless communication across distributed systems.
- Investigated and resolved production issues through testing and debugging, reducing defects and improving application reliability.
- Implemented monitoring and analytics solutions to identify performance issues and enhance user experience proactively.
- Collaborated with cross-functional teams to deliver high-quality software within aggressive project timelines.

Education

National University of Sciences and Technology (NUST)
Bachelor of Science in Computer Science

Aug 2018 – Sep 2022
